### 01 Executive Summary

What \$JELLY is — and what it isn't

### 02 Vision & Mission

Entertainment, community, and viral culture

### 03 The Story

The jar is open. There is no going back.

### 04 About UK Financial World

Professional management, independent identity

### 05 Token Information

Supply, standard, blockchain, and mechanics

### 06 Why One Billion?

Scarcity, simplicity, and future burns

### 07 Community First

The memes are the marketing

### 08 Utility & Roadmap

NFTs, gaming, merch, and beyond

### 09 Transparency & Governance

Public information and community trust

### 10 Socials & Market

Where to find, trade, and join \$JELLY

### 11 Risk Disclosure

Responsible participation in meme culture

### 12 Closing

One Billion Tokens. Endless Memes. Infinite Jelly.

# Executive Summary

KIM JONG JELLY (\$JELLY) is a community-driven parody meme token built on the Ethereum blockchain for one purpose — to make people laugh while bringing together a global community that enjoys internet culture, creativity, and blockchain technology.

\$JELLY does not attempt to solve complex financial problems or promise unrealistic returns. Instead, it embraces what made meme coins successful in the first place: entertainment, community participation, creativity, and viral culture.

The project's fictional storyline imagines one of the world's most serious and humourless figures experiencing an unexpected weakness...

***“Jelly.”***

The result is internet chaos, endless memes, hilarious artwork, community engagement, and a cryptocurrency that exists simply because the internet loves ridiculous ideas.

**ENTERTAINMENT** Memes, parody, and viral culture as the engine of growth.

**COMMUNITY** Holders create the culture. The community is the project.

**TRANSPARENCY** No fake promises. No misleading claims. Just jelly.

**He came for America... He stayed for the Jelly. ■**

# Vision & Mission

## VISION

To build one of the internet's most entertaining and recognizable meme communities while demonstrating that blockchain projects can unite people through humour, creativity, and shared experiences.

## MISSION

KIM JONG JELLY aims to create a positive, community-first ecosystem where holders participate in building memes, artwork, contests, social engagement, and viral content — without unrealistic promises or misleading marketing.

### No Fake Promises

We make no claims about future price performance.

### Community-Driven

All creative direction comes from the holders.

### Parody by Design

This is satire. The story is fictional. The laughs are real.

### Blockchain-Verified

Every transaction is transparent and publicly verifiable.

# The Story

---

Imagine the impossible.

A man famous around the world for  
being angry...

Visits America...

Discovers jelly...

Everything changes.

The internet loses its mind.

Memes begin spreading everywhere.

The jar has been opened.

There is no going back.

That ridiculous fictional storyline became the inspiration behind KIM JONG JELLY.

**Because sometimes the funniest ideas become the biggest communities.**

# About UK Financial World

---

KIM JONG JELLY 3 is part of the UK Financial World Division's Managing Partner Program.

## WHAT IS UK FINANCIAL WORLD?

UK Financial World is a division wholly owned by UK Financial Ltd. that provides a home for independently managed meme coins, blockchain projects, digital assets, tokenized real-world asset initiatives, and innovative cryptocurrency communities.

Projects within UK Financial World maintain their own identity while benefiting from professional management, marketing support, ecosystem development, and blockchain experience.

|                |                                                         |
|----------------|---------------------------------------------------------|
| Established    | 2018                                                    |
| Specialisation | Blockchain, digital assets, tokenized real-world assets |
| Division       | UK Financial World                                      |

# Why One Billion?

|                      |               |                       |
|----------------------|---------------|-----------------------|
| 1,000,000,000        | \$JELLY       | FIXED MAX SUPPLY      |
| Maximum Token Supply | Ticker Symbol | No Additional Minting |

Many meme coins launch with supplies measured in trillions or even quadrillions of tokens. KIM JONG JELLY intentionally launches with a significantly smaller maximum supply of only one billion tokens.

This fixed supply creates simplicity, transparency, and long-term scarcity. If the community later votes to burn tokens, the circulating supply could become even smaller.

|                       |                                                                              |
|-----------------------|------------------------------------------------------------------------------|
| <b>Simplicity</b>     | One billion is a clean, understandable number for all participants.          |
| <b>Transparency</b>   | A fixed, known supply removes uncertainty about future dilution.             |
| <b>Scarcity</b>       | Compared to trillion-supply memes, \$JELLY starts from a position of rarity. |
| <b>Burn Potential</b> | Community-approved burns could reduce supply further over time.              |

# Community First

The community is the project.

The memes are the marketing.

The artwork becomes the brand.

The holders create the culture.

Every social media post...

Every meme...

Every laugh...

Every joke...

helps build the JELLY ecosystem.

# Utility & Roadmap

While JELLY embraces meme culture at its core, the project may expand through community-driven initiatives. Development priorities will be guided by community participation and long-term sustainability.

## POTENTIAL UTILITY EXPANSIONS

- NFT collections featuring original JELLY artwork
- Merchandise — wear the jar, be the jelly
- Gaming integrations within community platforms
- Community events, meme contests, and holder rewards
- Charity initiatives voted on by token holders
- Future blockchain collaborations and cross-chain expansions

## 5-PHASE ROADMAP

**THE JAR IS OPEN. THE COMMUNITY IS THE POWER. WE ARE JUST GETTING STARTED.**

# Transparency & Governance

KIM JONG JELLY believes transparency builds stronger communities. The project will provide public blockchain information, contract details, and ongoing project updates as development continues.

**Public Contract**

Smart contract address publicly visible and verifiable on-chain.

**Renounced Ownership**

No single party controls the contract after launch.

**Locked Liquidity**

Liquidity is locked, preventing rug-pull scenarios.

**Zero Tax**

0% buy tax and 0% sell tax — no hidden fees.

**Community Updates**

Regular public updates as the ecosystem grows.

**Audit Transparency**

Contract information available for community review.

# Risk Disclosure

KIM JONG JELLY is a meme token created primarily for entertainment and community engagement. Purchasing cryptocurrencies involves substantial risk, including the possible loss of your entire investment. Nothing in this white paper constitutes investment advice, financial advice, legal advice, or a guarantee of future performance. Community participation should always be based on individual research and responsible decision-making.

|                      |                                                                               |
|----------------------|-------------------------------------------------------------------------------|
| Market Risk          | Meme token values can fluctuate dramatically or reach zero.                   |
| Liquidity Risk       | Market conditions may affect the ability to trade at expected prices.         |
| Technology Risk      | Smart contracts and blockchain networks carry inherent technical risks.       |
| Regulatory Risk      | Cryptocurrency regulations continue to evolve across all jurisdictions.       |
| Community Risk       | Meme projects depend on sustained community engagement for cultural value.    |
| No Utility Guarantee | \$JELLY's utility expansions are aspirational and subject to community votes. |

No promises. No guarantees. No financial advice. Just a community, a meme, and a very sticky jar of jelly.
